Published by Kjellander Sjöberg, 2020

Kjellander Sjöberg was founded in 1998 and is a medium-sized architectural practice with a diverse and dedicated international team led by four partners:

Mi Inkinen, Ola Kjellander, Stefan Sjöberg and Lena Viterstedt.

KS operates from Stockholm, Malmö and London, vibrant cities where we are a part of ongoing transformations to improve and create new liveable places. We work on every scale to support people's daily life and generate rich, green urban experiences.

We are driven by developing sustainable projects that meet the challenges of climate change and make meaningful use of resources; that tell a story of life, content, interaction, local neighbourhoods and society. We base all our work on a collaborative approach and dialogue, to create urban areas, buildings and landscapes that actively contribute to shaping a better future.

INTRODUCTION

The hand moves across the paper,
the pen follows the spirit
an embedded intuition
in the body.

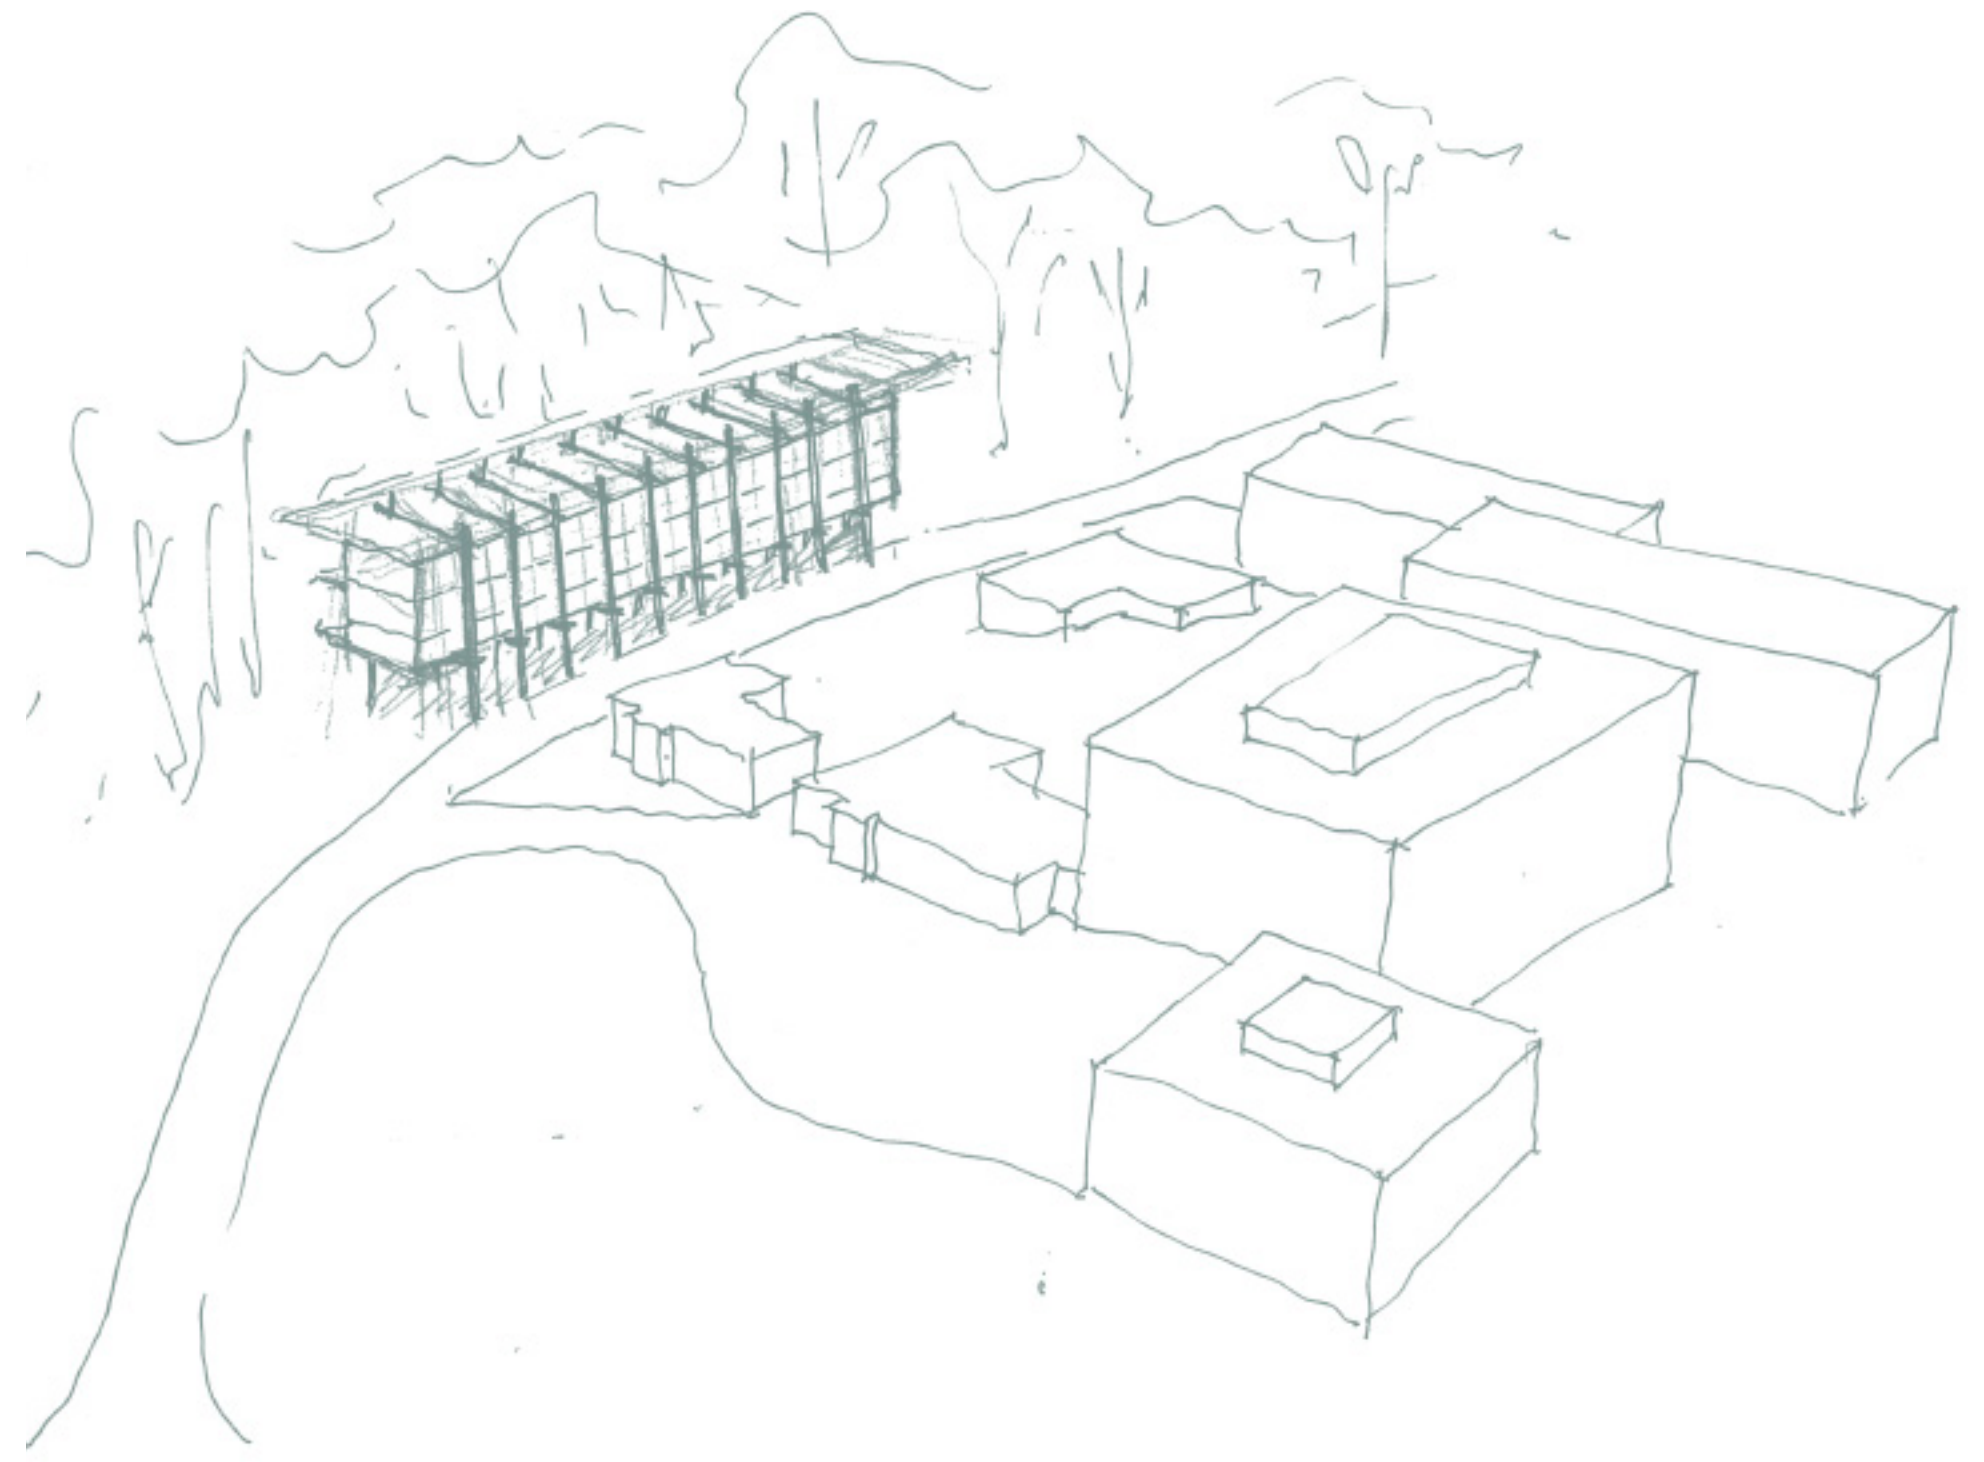

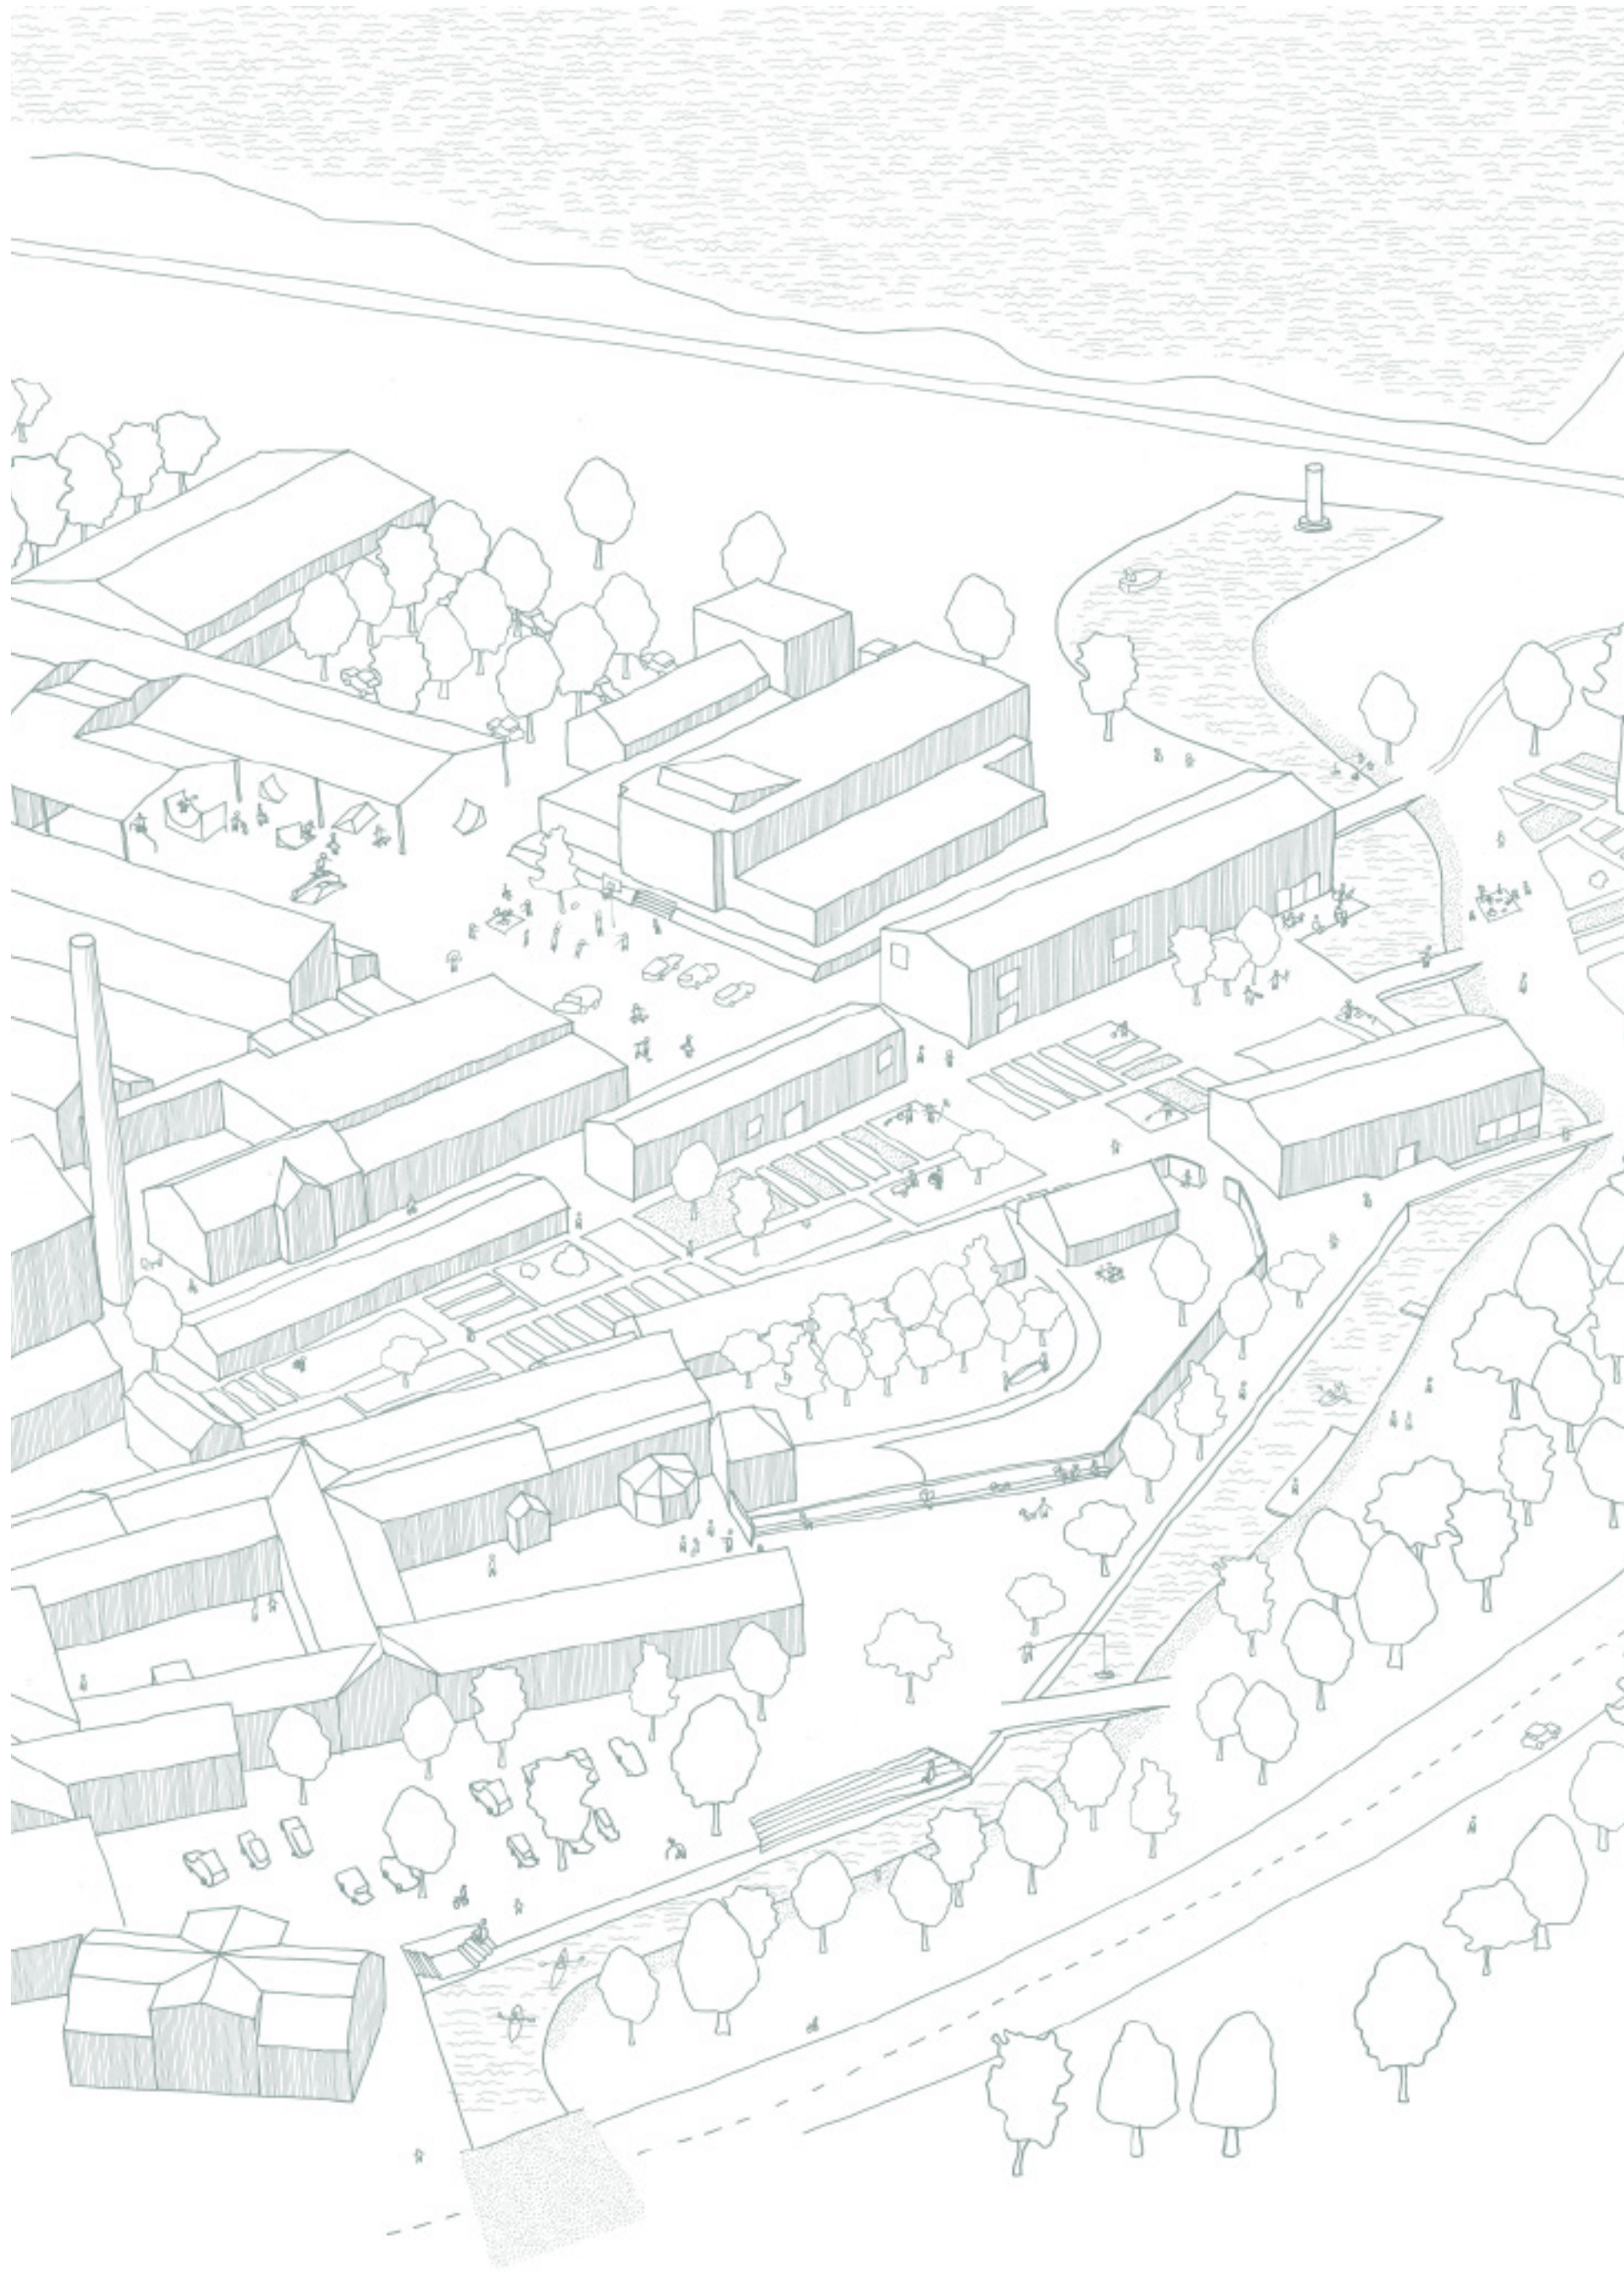

From scattered pieces of information
light strokes across a coarse surface,
bold graphite darkens, yet highlights
ideas,
inherent relations,
connections.

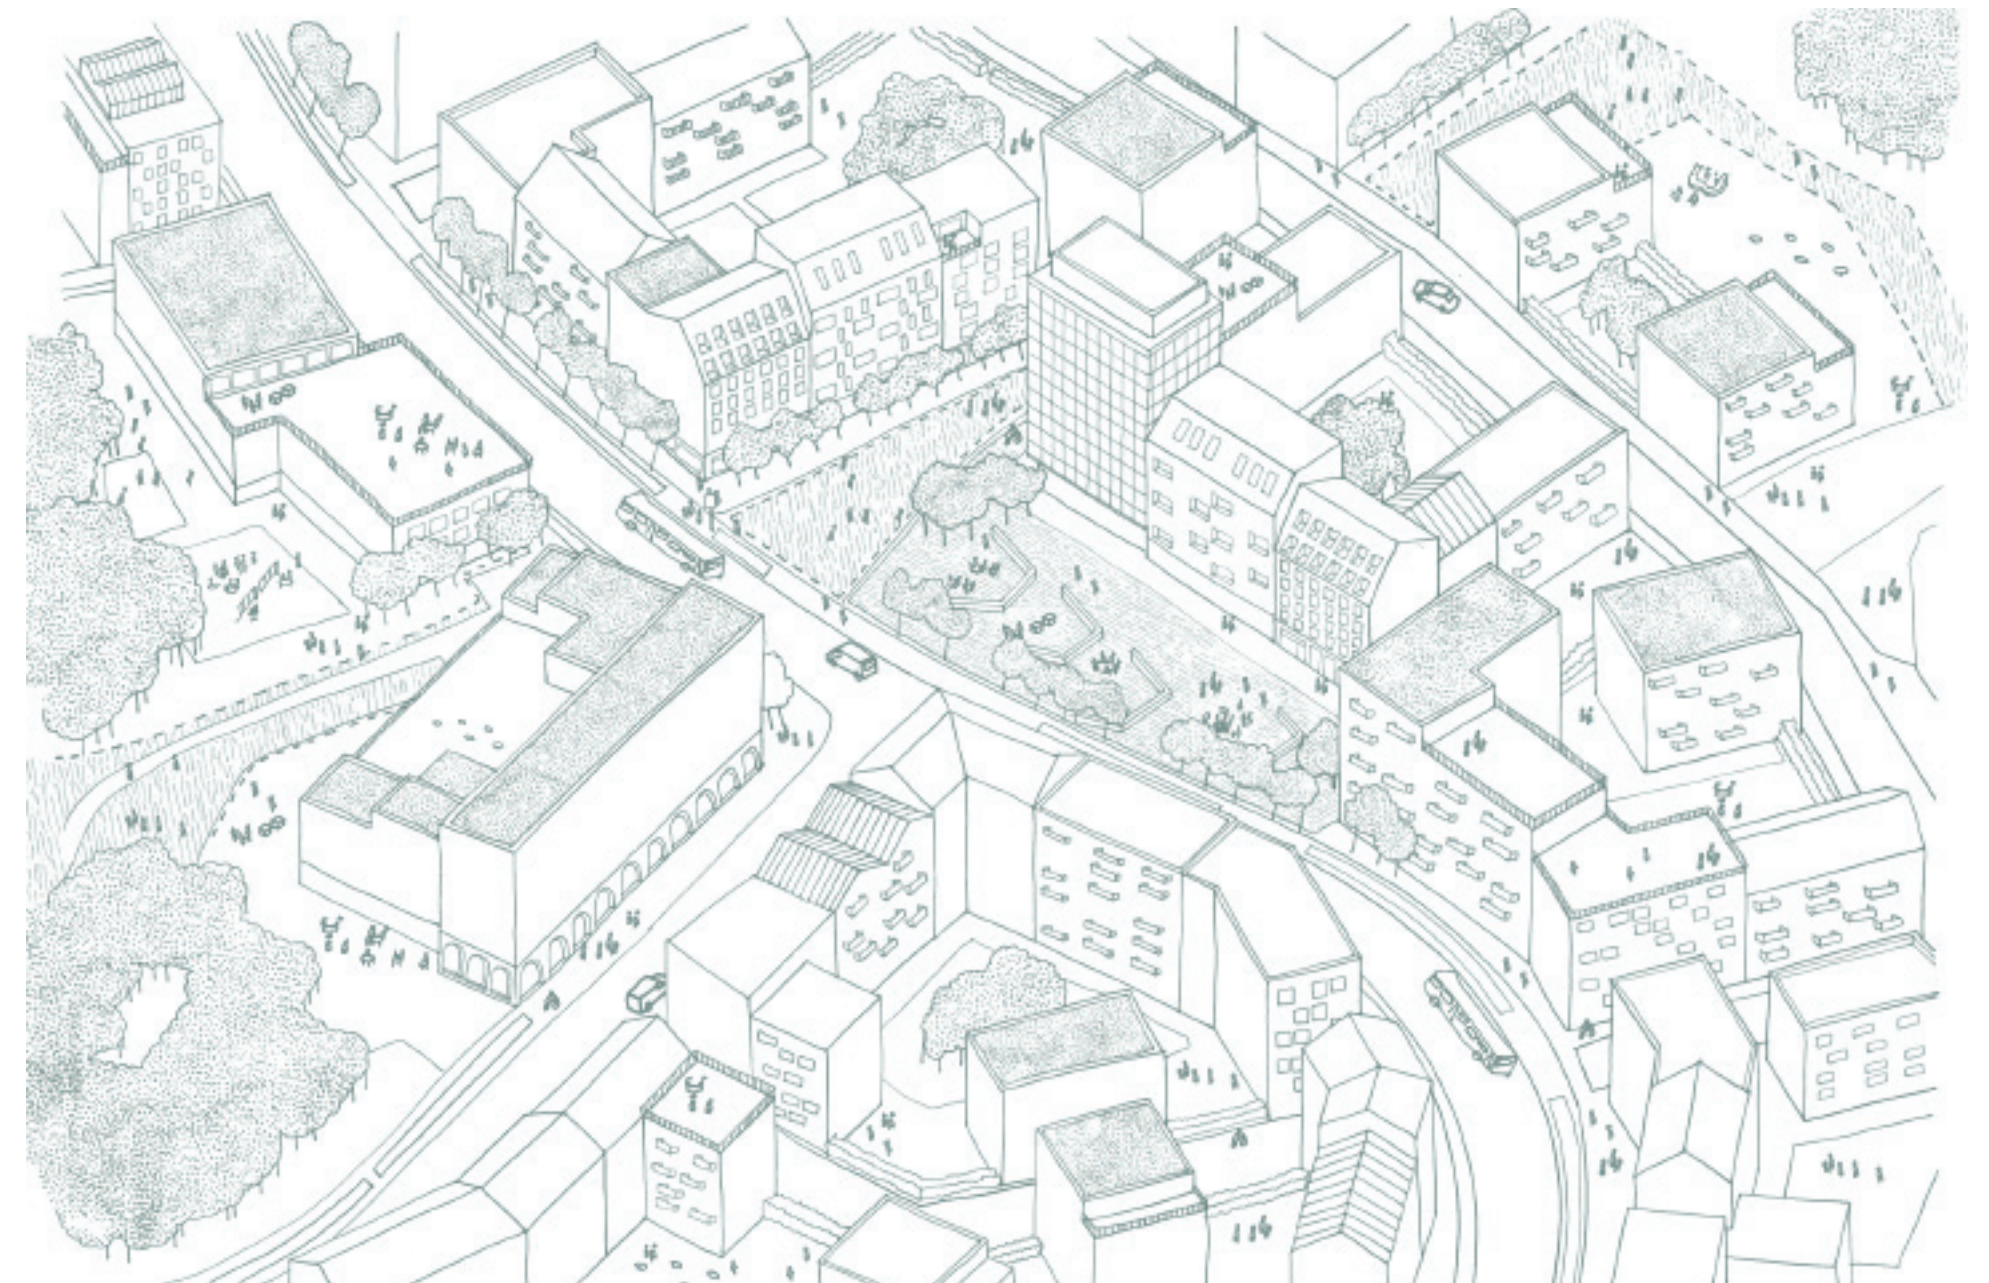

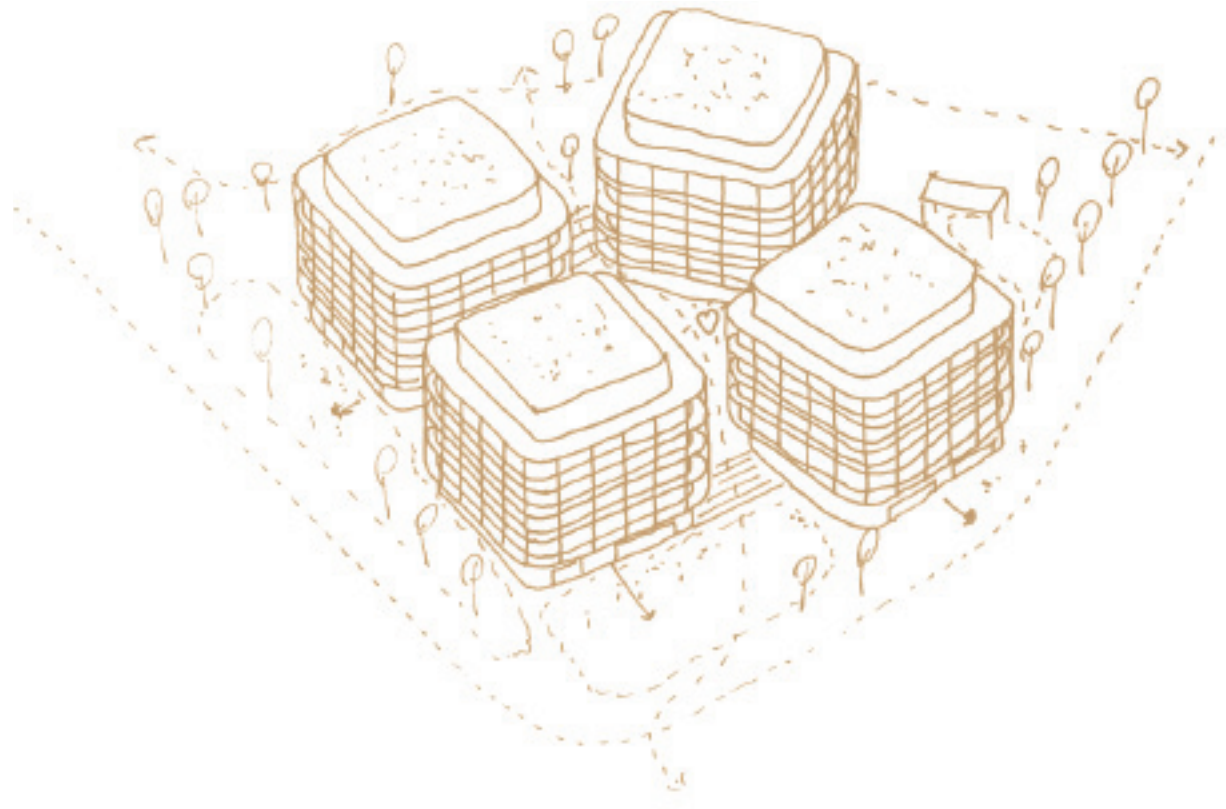

Synthesising
organising
potential

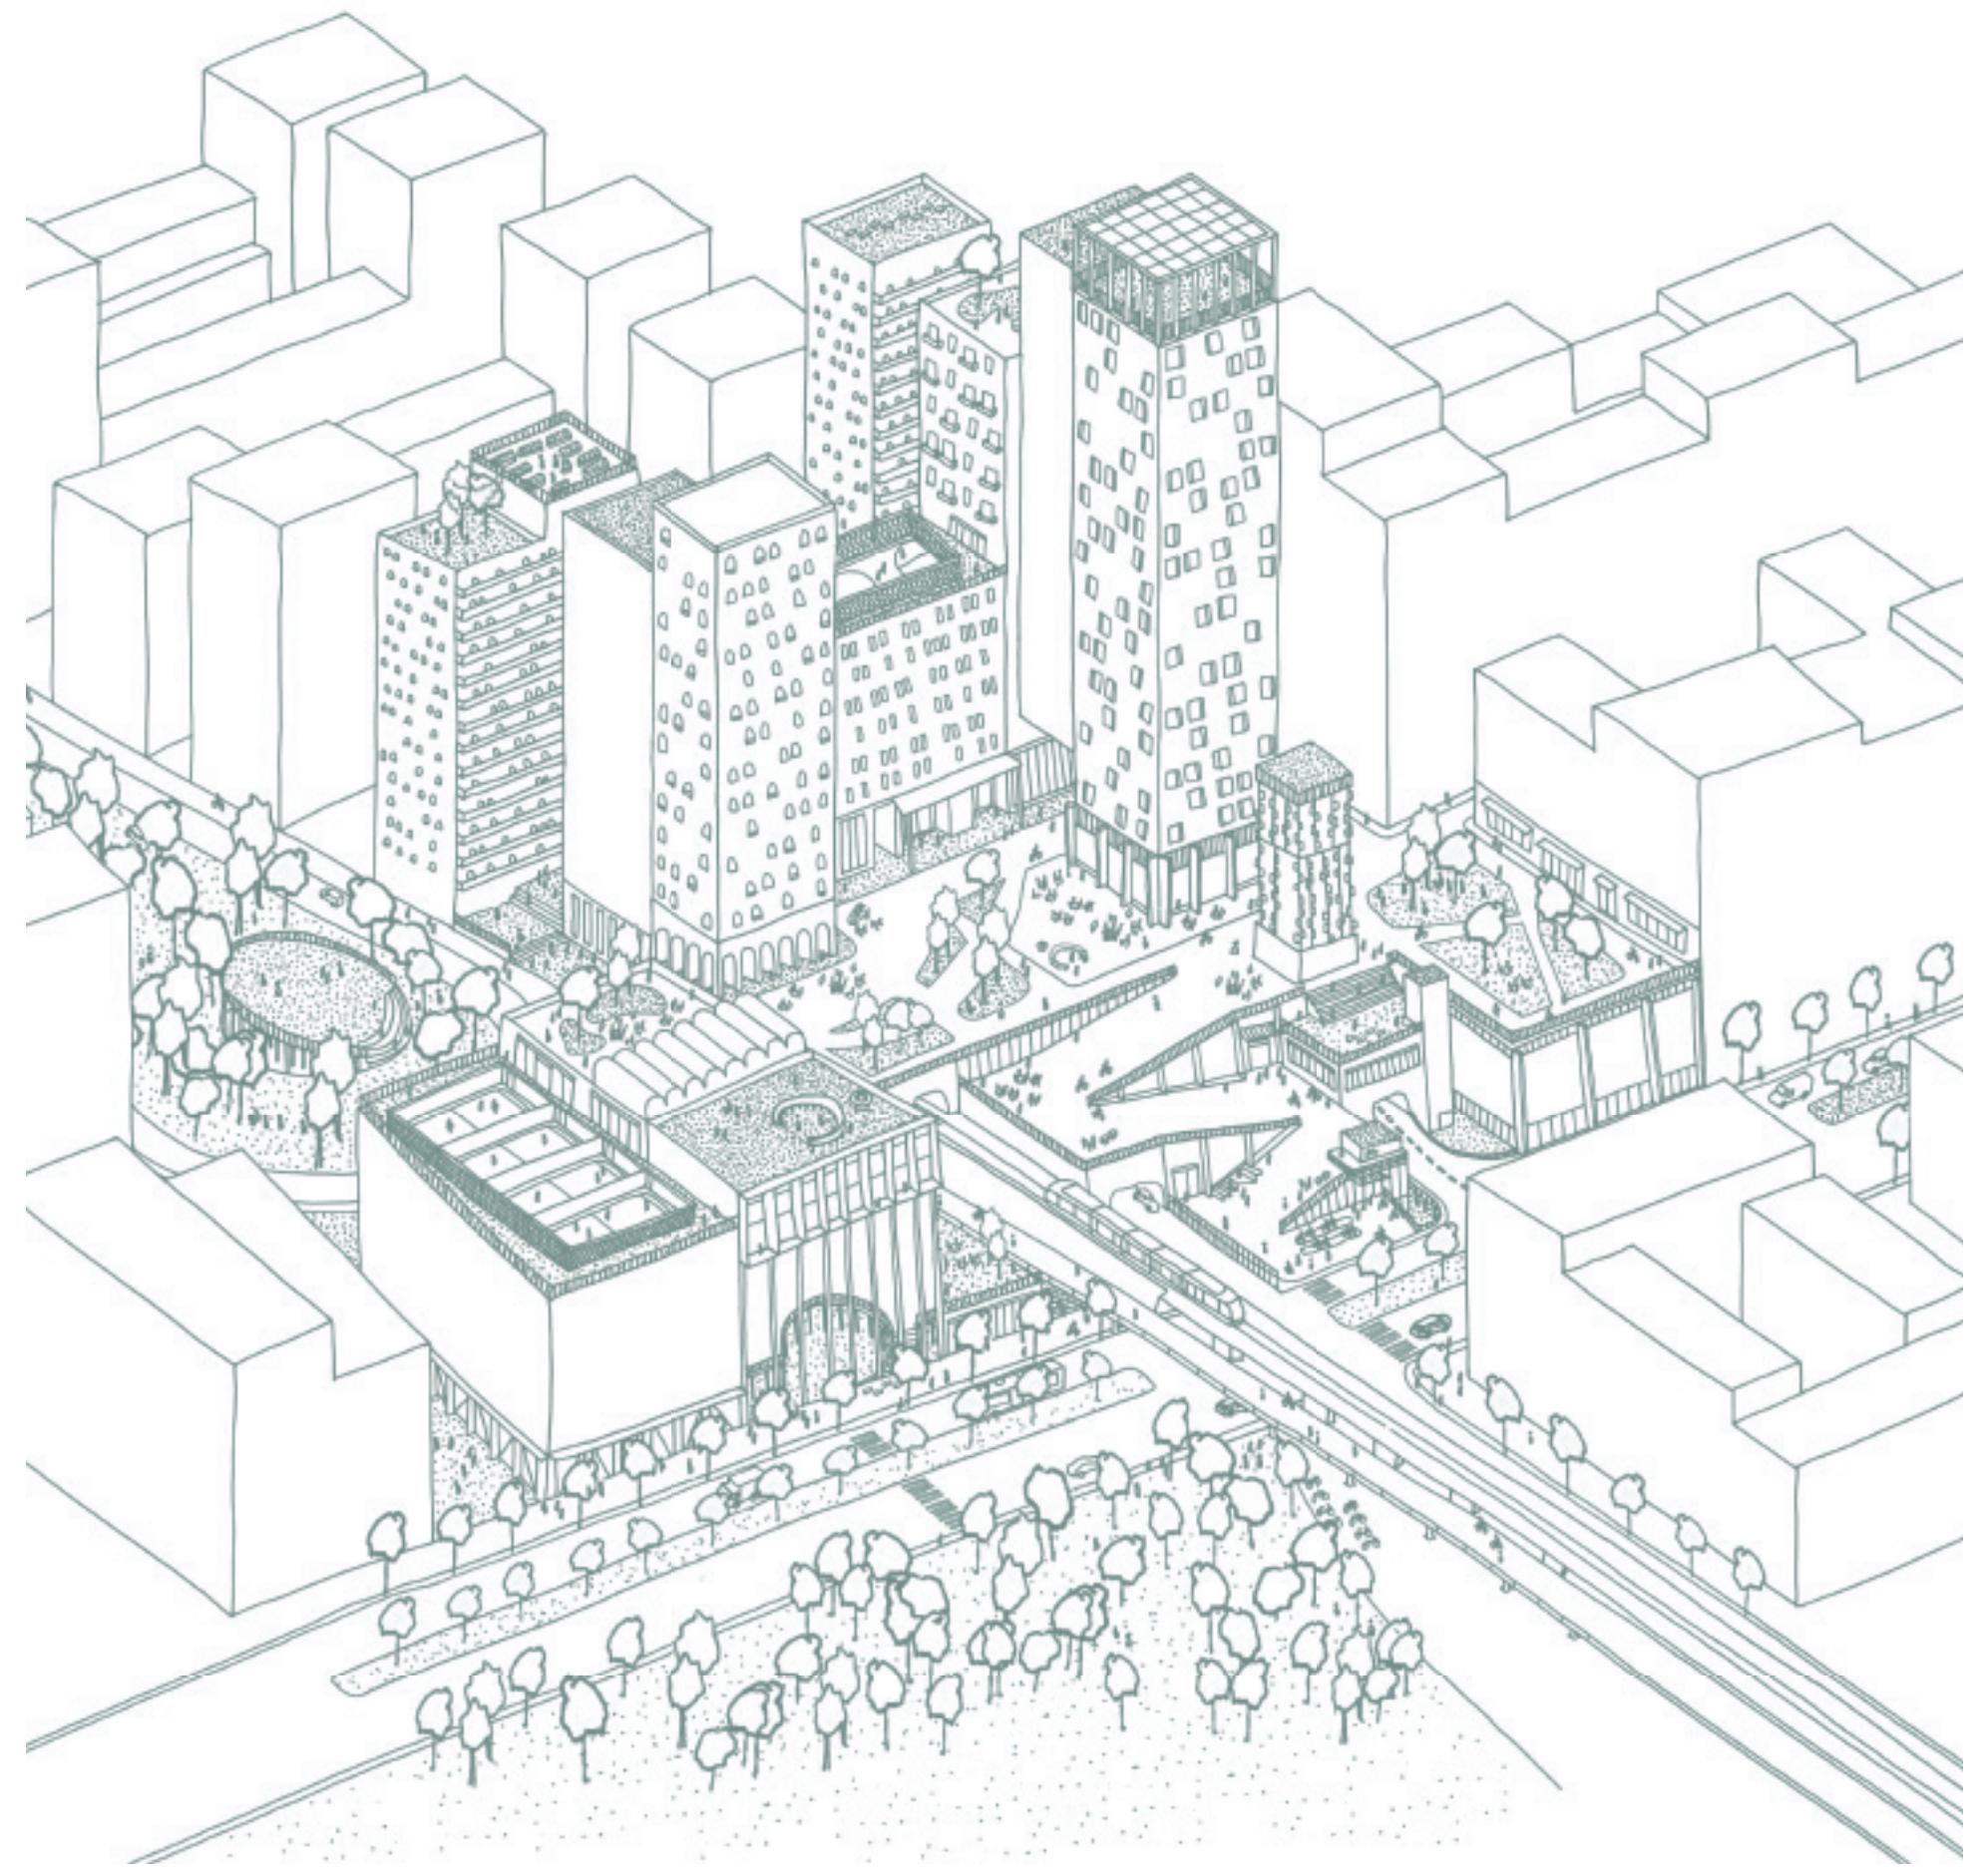

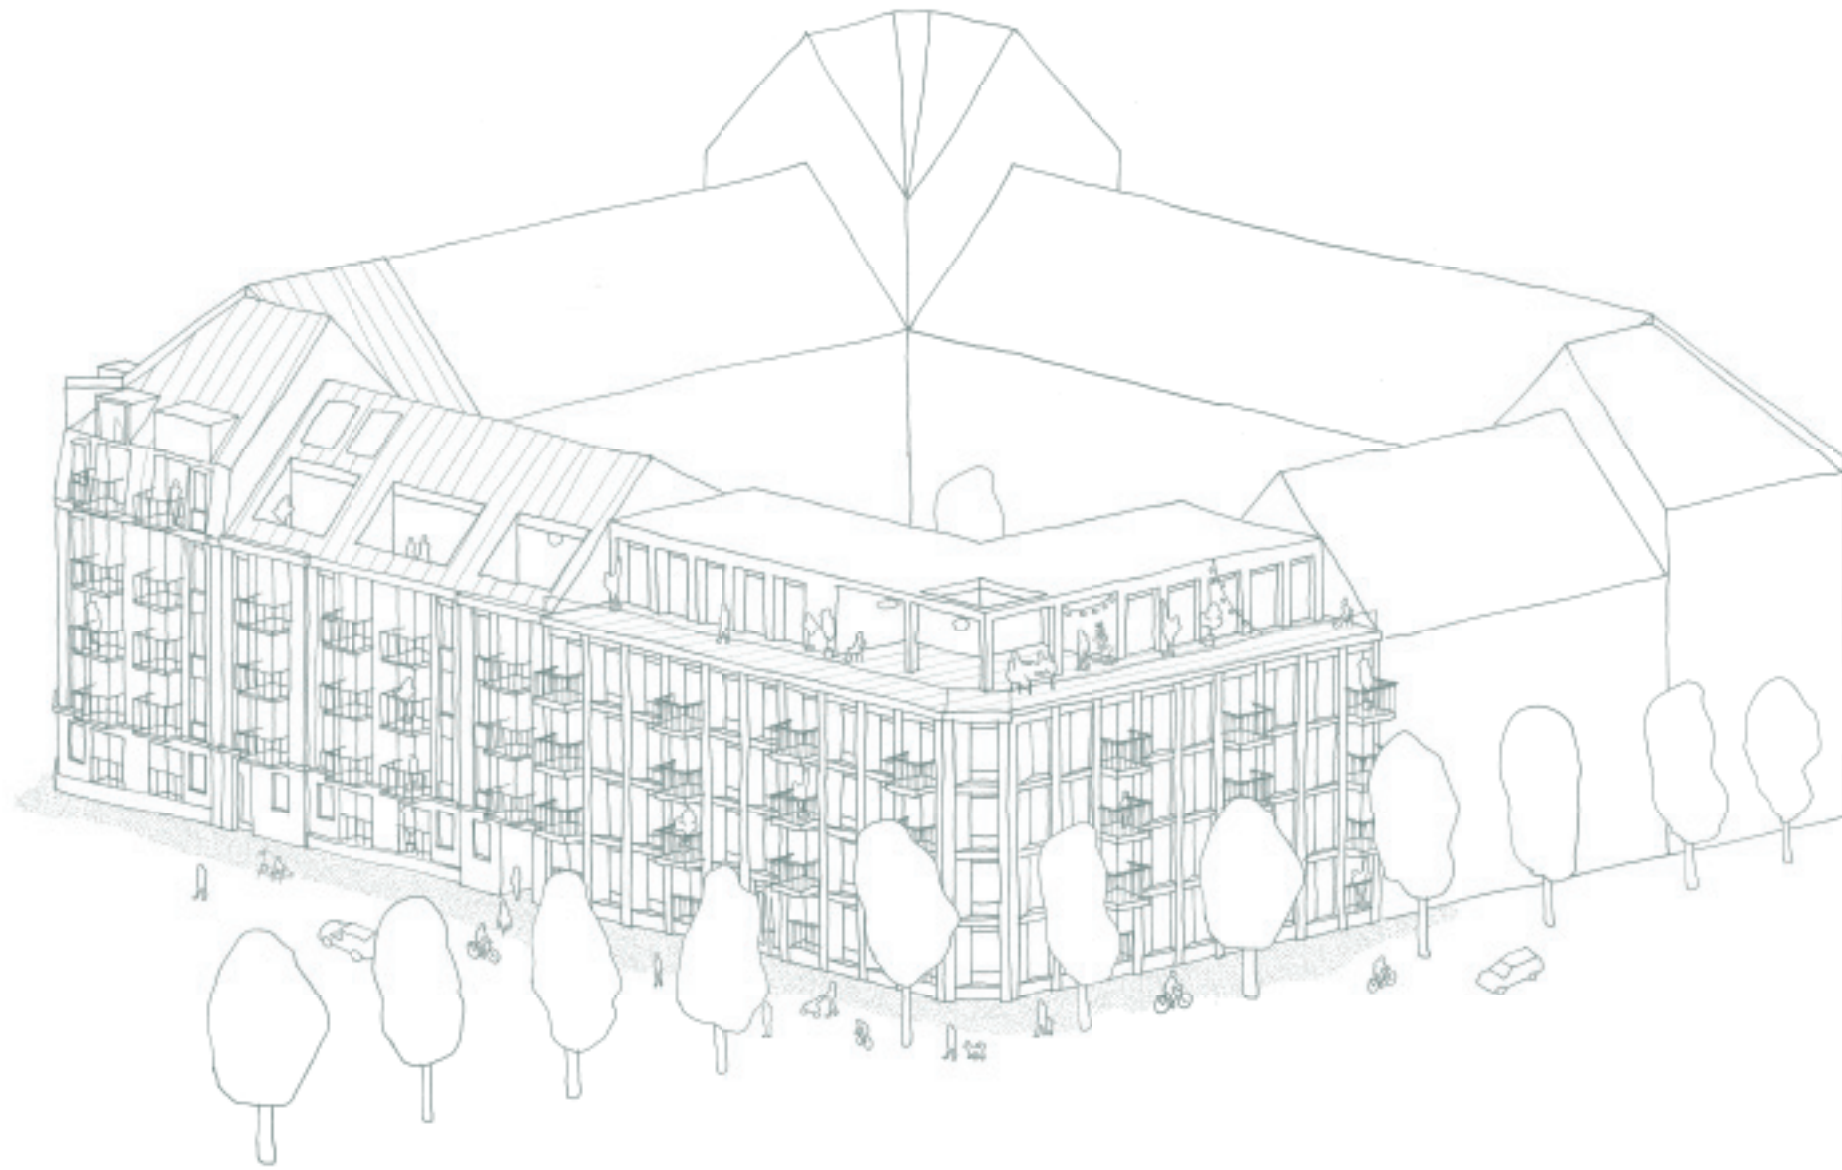

layers and aspect of place, history, content and experiences to come
forms a comprehensive story,
imprecise,
open for interpretation
in exact reverence to emotional aspiration and character.
